DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-9 and 14-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoo US 2002/0146506, in view of Teru et al. US 6,331,281.

Yoo discloses an apparatus and process including using the waste gas from semiconductor manufacturing apparatus and passing the gas through a hydrogen separator, purifying the hydrogen gas and recycling the hydrogen gas back to the semiconductor manufacturing apparatus (see fig. 3 and related text).

Yoo does not disclose decomposing ammonia contained in the waste gas to produce hydrogen gas.

Teru et al. discloses a process of decomposing ammonia contained in a waste gas stream into hydrogen and nitrogen (col. 16, lines 10-14).

Therefore it would have been obvious to one of ordinary skill in the art to modify Yoo as taught by Teru et al., because it would allow greater amounts of hydrogen to be recycled and the elimination of dangerous ammonia gas.

Response to Arguments

Applicant's arguments with respect to claims 1-9 and 14-22 have been considered but are moot in view of the new ground(s) of rejection.
